EDUCATION

Master of Science and Engineering, Computer Engineering

Shahid Beheshti University (SBU)

📅 September 2022 - current 📍 Tehran, Iran

Bachelor of Science, Chemical Engineering

Isfahan University of Technology (IUT)

📅 September 2016 - December 2021 📍 Isfahan, Iran 🎓 GPA: 3.7

CAREER OBJECTIVE

Hi! My name is Sina Sadeqi and I am trying to make it as a professional software engineer. I studied Chemical Engineering for 5 years but I've always been interested in computers and Technology more often than anything else. I had two courses for programming in university where we learned about and worked with C & C++ programming languages. I was having so much more fun than I ever did studying Chemical Engineering so I knew I wanted to have a career in Computer Technologies & Sciences. So I kept working on my programming skills and learned more about everything with the help of my friends that were studying Computer Engineering at the same university. And soon enough I applied for a Computer Engineering degree for my Master's where I ranked 12th in I.T. and 120th in C.E. in the country and this fall I'll start my first semester.

As for my career, I've been focusing on working on software engineering; mainly Front-End Web Development. It's been 2 years since and meanwhile, I've done a couple of projects for myself on and off but couldn't get any job offers because I live in a small city and an unfortunate country where the opportunities and job offers are very sparse. You can review my work on my GitHub account linked at the top of this document and if you liked it I'll be glad to be your co-worker.

Thanks for reading my story! You can contact me via my contact information also linked at the top. Have a good day!

WORK EXPERIENCE

Software Engineer

Derakhshan Hesab

📅 June 2021 - August 2021 📍 Arak, Iran

SKILLS

Programming Languages
- JavaScript
- C / C++
- C# / .NET Core

Web & Browser Technologies
- JavaScript ES6
- CSS 5
- html 3
- DOM Manipulation
- jQuery
- Chrome Extensions

Front-End Framework
- ReactJS
- React Hooks
- Redux
- React Native
- NextJS
- React Router
- VueJS

Styling
- CSS
- Flexbox / Grid
- Sass / Scss
- TailwindCSS
- Material UI

Back-End & Database Technology
- NodeJS
- ExpressJS
- MongoDB
- Postman
- MySQL
